

# BAUER BG 33

## Rotary Drilling Rig Base Carrier BT 85

PremiumLine

## Experience for you!

*“Technology market leader and pioneer for innovations, at the same time down-to-earth with responsibility towards society and environment - that's our goal.”*

Prof. Dr. Sebastian Bauer

We could start by telling you about Sebastian Bauer, who founded a copper forge in the German town of Schrobenhausen some 200 years ago. We could then move on to how his workshop prospered and developed to a leading construction company for specialist foundation engineering. The story would continue to the mid 20<sup>th</sup> century, when innovation and the drive for perfection prompted Bauer to develop and build their own high-quality and high-performance machinery.

And it still wouldn't end in the 21<sup>st</sup> century, Bauer now family-run in the seventh generation and meanwhile a globally operating group with more than 100 branches and subsidiaries operating in the fields of special foundation engineering (Bauer Spezialtiefbau), in manufacturing of foundation equipment (Bauer Maschinen) and focusing on products and services in the fields of water, energy, mineral resources and environmental technology (Bauer Resources).

But we think what really matters about us and to our customers is this:  
We are a strong partner with face and values, we are down to earth, and we are dedicated to perfection in everything we touch.

**1790**

## More than machines: Competent consulting

*Quality is not an act,  
it is a habit.*

Of the thousands of machines Bauer Maschinen has built since production started in the 1970's with the first rotary drill rig BG 7, many of them are still in operation all over the world – in Siberia as well as in the desert. State of the art technology developed end-to-end by our inhouse engineers and full machine tests prior to delivery are one side of the coin. Bauer Maschinen can serve any customer need with the most comprehensive product portfolio.

The other side is project-specific consulting by highly trained experts, with a focus on your special requirements.

- Quality and experience in specialist foundation engineering
- Global operation – local contacts in over 70 countries
- Reliability in technology, service
- Customized solutions
- On-site support over entire machine service life

**1980's**

**2011**

Introduction of BG ValueLine and BG PremiumLine

**2014**

With EEP Bauer sets new standards for efficiency

The BG PremiumLine stands for multifunction equipment for a variety of foundation construction systems. The selection between two model ranges allows an optimum choice for differing project or transportation requirements.

Specific highlights of the BG PremiumLine are:

- High safety standards
- Environmental sustainability, economic efficiency and performance
- Easy to transport and short rigging time
- High quality standard
- Long lifetime and excellent resale value

### The H-model line

#### Special features

##### of the H-model line are:

- Fast loading onto transport vehicles
- Easy rigging on-site due to compact design
- Rapid shifting to new working positions at construction sites with underpasses or below low bridges

**BG 23 H**  
**BT 65**

**BG 23 H**  
**BT 75**

**BG 28 H**  
**BT 75**

### The V-model line

#### Special features

##### of the V-model line are:

- Big borehole diameters
- Large drilling depths
- Extended service intervals and power transmission with low vibrations due to the robust design of the kinematic system

**BG 33**  
**BT 85**

**BG 36**  
**BS 95**

**BG 45**  
**BS 95**

## The Rotary Drilling Rig BG 33 PremiumLine (BT 85)

Max. drilling diameter:	2,500 mm
Max. drilling depth:	72.4 m
Torque (nominal):	342 kNm
Max. height:	30.3 m
Engine:	CAT C13 354 kW

BG 28 H  
BT 85

BG 33 H  
BT 85

BG 36 H  
BS 95

BG 55  
BS 115

BG 72  
BT 180

#### Modern, ergonomic operator's cab

- FOPS compliant with additional protective roof guard
- Premium operator seat, air-sprung and heatable
- Joystick controls with high functionality
- B-Drive for multi-functional potentiometer input

#### Powerful engine CAT

- C 13 354 kW (Stage V / Tier 4 final or ORA\*)
- Diesel particulate filter in exhaust emission standard Stage V
- Low noise emission
- Worldwide CAT service partners

#### Safety equipment

- Walking platform with handrail (foldable for transport)
- Upward folding service doors
- Guardrails on upper level (foldable for transport)
- Rear view cameras
- Variable stackable counterweight elements with low weight of individual elements (4.9 t or 2.5 t)

- Reduction of fuel consumption by up to 30%
- Increased productivity through improved efficiency
- Significantly reduced noise levels
- Tried and proven suitability for practical application
- Optimized parallel operation of main and auxiliary consumers

\* Exhaust emission equivalent Tier 3 / Stage III A

### Safe and easy transport

- Mobilization kit with hydraulically operated pin connection for fast and safe demounting of lower mast section
- Hydraulic locking of support trestle
- Activated by remote control multi

### Main winch on upper carriage

- Single layer winch for minimized rope wear
- Constant line pull
- Designed for heavy continuous operation (M6 / L3 / T5)
- Service-friendly winch position
- Swing down mechanism for transport

### Flexible mast concept

- Vario-masthead
  - Mast head for drill axis distance 1,100 expandable to 1,400 mm
  - Increased stroke for Kelly bars when using an upper Kelly guide
  - Tilttable main jib for single-pass processes and for optimized transport
- Vario-crowd system
  - Transport possible with built-in crowd ropes (Kelly drilling)
  - Reduced headroom version possible by means of integrated Vario-mast section
- Vario-mast section 2 m
- Vario-mast section 2 m + mast extension 2 m (only Single-Pass)

### Remote control for rigging the machine

- The remote control can be used to perform numerous rigging functions outside the danger zone, such as moving the drilling rig, telescoping the under carriage, etc.
- Operation within sight of the controlled rigging functions
- Rugged and compact wireless remote control Multi with LCD screen
- Lockable storage box for the remote control can be accessed from ground level

#### Kelly set-up

- Long Kelly guide
- Integrated shock absorbing spring system
- Kelly visualization (see page 15)
- Enhanced drilling performance
- High operation comfort
- Reduction of wear on Kelly bars and drive keys

#### Rotary drive

- Optional single gear drive or multi gear drive
- Max. torque casing 342 kNm
- Max. speed of rotation 53 rpm
- Various modes of operation, partially selectable speed of rotation and torque

#### Hydraulically operated pin connection on the crowd sledge

- Pin connection controlled via remote control
- Simple and secure attachment of rotary drive, no working at heights unsecured

#### KDK 300 S

#### KDK 340 K

## Base carrier BT 85

### Standard

- Removable counterweight elements
- Protective roof guard
- Radio with MP3, USB and Bluetooth hands-free kit
- Grating in front of cab
- Retractable grating on side of cab
- Electric refueling pump
- Energy-Efficient Power (EEP)
- Premium operator seat
- Cameras for rear area and main winch surveillance
- Integrated service platforms
- Central lubrication system
- LED spotlights
- Climatronic
- Guard rails on the upper level (foldable for transport)

### Optional

- Counterweight, variably adjustable
- Rear support unit, **Fig. A**
- High-pressure cleaner with water tank, **Fig. A**
- Compressor 1,000 l/min
- Electric generator 13 kVA
- Bio-degradable hydraulic oil
- Arctic kit / Arctic kit plus
- Cab space heater incl. time switch
- Additional camera (at customized location)
- Front screen guard
- Weather protection
- Remote control Basic, **Fig. B**
- Remote control Multi
- Premium operator seat with air-condition

## Drilling rig attachment

### Standard

- Sturdy V-type mast kinematic system
- Main winch with hydraulic free-fall control
- Hydraulic locking for support trestle
- Swivel for main rope
- Vario-mast head, **Fig. C**
- Pivoted anchor point for auxiliary rope

### Optional

- Upper Kelly guide
- Extension of drill axis to 1,400 mm
- Hydraulic bolt connection on rotary sledge for easy mounting and demounting of rotary drive
- Mast support unit
- Vario-crowd system with Vario-mast section 2 m
  - Transport possible with built-in crowd ropes (Kelly operation)
  - Reduced headroom version, possible with integrated Vario-mast section 2 m, **Fig. D**
- Mast extension 2 m (only Single-Pass)
- Lattice mast extension
- Swivel for auxiliary rope
- Attachment of casing oscillator up to BV 1500 with UW 80 or up to BV 2000 with UW 100, **Fig. E**
  - Powered by on-board hydraulics of the base carrier
  - Controlled from operator's cab
  - Weight of drilling rig can be activated by mechanical coupling
- Attachment of automatic casing drive adapter
- Attachment of Kelly auger cleaner
- Concrete line attachment
- Air line attachment
- Mobilization kit

## Rotary drive

### Standard

- Rotary drive KDK 300 K (single-gear drive)
- Selectable modes of operation
- Kelly drive adapter for outer Kelly tube 419 mm
- Integrated Kelly damping system
- Exchangeable Kelly drive keys
- Cardanic joint
- Quick-release hydraulic couplers
- Transport supports
- Lifting gear

### Optional

- Rotary drive KDK 300 S (multi-gear drive)
- Rotary drive KDK 340 K (single-gear drive)
- Kelly drive adapter for outer Kelly tube 394 / 470 mm
- Torque multiplier BTM 720 K Kelly drilling
  - Torque 420 kNm (nominal)
  - Increase of torque for casing installation
  - Easy attachment
  - Separate sledge
  - Connection to rotary drive with cardanic joint
- Torque multiplier BTM 400 for CCFA

## Measuring and control system

### Standard

- PLC processor for all electrically actuated functions
- Automatic mast alignment with memory function
- Depth measuring device on main winch
- Distance measuring device on crowd winch
- Main winch with electronic load sensing
- Slack rope prevention
- Automatic swivel alignment function
- Hoist limit switch for main and auxiliary winch
- Auxiliary winch with hydraulic load sensing
- Crowd stroke monitoring
- Crowd speed control
- Speed measuring control for rotary drive (KDK)
- Hold-back control
- Electronic mast reach limiter
- Casing length monitoring
- Kelly visualization, **Fig. F**

### Optional

- Electronic load sensing for auxiliary winch
- Recording of concrete pressure and volume for Single-Pass processes
- Software modules for further applications
- Adaptive Kelly speed assistant
- Automatic drilling and extraction control for Single-Pass processes
- Preliminary set-up for BAUER Concrete Link

## B-Tronic System

### B-Tronic

The BAUER B-Tronic system allows completion of construction tasks in a reliable and accurate manner, even under extreme operating conditions

- The high-resolution touchscreen display ensures excellent user-friendliness
- The display can be optimally adapted to the operating situation and the amount of light present by changing the brightness level, the color scheme and the day/night mode
- The main parameters such as pump pressure, torque and drilling depths can be viewed at a glance

### B-Drive

The B-Drive is a central operating and visualization system

- B-Drive combines adjustable potentiometer values on one display
- Ergonomic positioning of the display on the right column of the operator's cab

### Tablet

The tablet is the multi-functional tool for the Bauer machine

- Online access to the customer portal, handbooks, equipment management systems and much more
- Standard internet connection via the DTR module, which is located in the machine
- The operator's screen can be mirrored live on the tablet to track the operating process

### Device networking

#### DTR module

- The DTR module allows equipment and production data to be made available to a wide variety of users

#### WEB-BGM

- WEB-BGM is a software used to retrieve equipment data and establish the locations of various machines, even if you are not on site

#### Report of production data

- Standardized reports for the documentation of drilling progress and verification of performance and quality

### Adaptive Kelly speed assistant

The assistant raises and lowers the Kelly bar safely and quickly and allows an easy operation. The automatic control of the speed of the main winch reduces the speed at the transition points of the Kelly sections.

This provides maximum safety with minimum wear.

The permanent monitoring of the parameters prevents a locked Kelly bar from being raised or lowered accidentally and thus causing damage.

### Kelly visualization

Display of the locking recesses, as well as representation of the controlled extension and retraction of the Kelly bar on the B-Tronic system. The rapid approach of the locking position results in a considerably enhanced drilling performance. In addition, the level of wear that the Kelly bar and drive keys are subject to is significantly reduced.

### Kelly drilling assistant

Saves the current crowd speed and the speed of the rotary drive. It enhances drilling performance with simultaneous hands-free operation. Drilling parameters can be adjusted during the automated drilling procedure.

### Automatic drilling and extraction control for Single-Pass processes

The system controls the drilling and/or extraction speed of the crowd system and enables hands-free operation. This ensures the production of a high-quality pile while simultaneously minimizing the amount of concrete.

### Satellite-based positioning

The BAUER Assistant Positioning System (B-APS) allows the position of a bored pile to be located extremely accurately. Documentation is provided for the nominal and actual coordinates, as well as the corresponding accuracy of each bored pile. Manual marking of the piles is no longer required.

Numerous other assistance systems are available in our portfolio.

	Basic version	Upgraded version
Under carriage	UW 80	UW 100
Rotary drive	KDK 300 K/S	KDK 340 K
